DR. DAVID MASTRO

A friend in the health and beauty industry told me some people look much younger after having cosmetic dentistry but that some actually look older! What could cause such different results?

Only expert cosmetic dentistry creates a truly dynamic, youthful appearance. The look is completely natural and, if desired, can even widen a smile, give a subtle lift to the face and fullness to lips.

Mediocre cosmetic dentistry and older-looking smiles often have thicker teeth with unnaturally smooth surfaces and poor color artistry. Especially "aging" are imperfectly fitting crowns and veneers with darker lines or bulk or ridges at the gum line.

Expert cosmetic dentistry creates relaxed, attractive faces and dynamic smiles with comfort, gum health, fit and coordinated function, too. Such works of art turn back the clock for decades! (See more photos at AlluringCosmeticDentistry.com)
